

Make your own poster or banner

Posters or banners are a great way to spread the word.

Saving the world's forests is never going to be easy, but you can make a difference by telling others what's so great about trees and why we ALL need to protect them.

Here are some design ideas for you.

- Choose your main message and a picture to go with it.
- Draw or paint your design on a sheet of recycled paper, an old piece of cardboard or an old sheet. (Try to re-use and recycle where possible.)
- Alternatively, you could design your poster digitally on a computer or tablet.
- Ask your teacher if your design can be hung on the wall or posted on the school website.
- You could talk to your grown-up about sending a copy or a photo of your design to the local council and asking them to share it.
