

You may find that some items or pages within a Canva template supplied by Home Office are locked for editing. This has been done because that item/page doesn't require any customizing by Consultants.

This PDF uses the 2024 Holiday Gift Guide as reference, but the same type of edits can be applied to any Canva template or design!

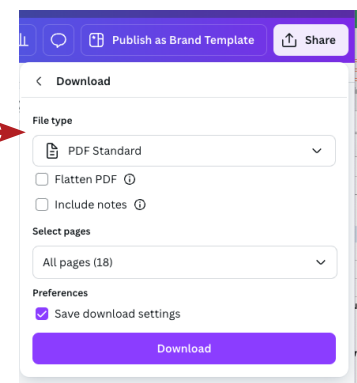

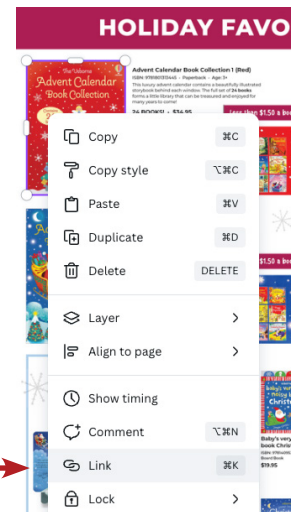

WITHIN YOUR CANVA TEMPLATE/DESIGN:

1. If your design has been supplied to you by Home Office, the first thing you should do before you begin editing is review each page and look for notes from the Marketing dept. All notes will appear as bright pink boxes so they're hard to miss! Do not download your design if you haven't looked for notes and deleted these boxes.
2. You can link your design to your replicated website any way you choose!
 - Add your website URL at the bottom of the page
 - Add a QR code to link to a specific category or page on your site
 - Link each picture of a book to the book on your site
 - If a bubble says "Over x-number of books in this series!", then you could link that bubble to the series/category on your site
 - Link a title to a reel or Youtube sneak peek you've done
 - Add links to Cart Links you've created
 - Link your social media accounts to the icons supplied

Flyers & Guides supplied by Home Office will come prepared with invisible boxes around each title, as well as hyperlinked Table of Contents! To find out whether there are invisible boxes within the file, just move your mouse around the page. Boxes will appear as you move over them. Alternately, if you "select all" on the page, it will reveal all boxes.

3. To add a link, simply right click on the item (whether it's an invisible box around a book, or a photo/graphic you added) and click on "Link". Copy and paste the website URL here.
4. When you've completed your edits, click "Share" at the top right. Select "Download" from the pop-up menu, and for File Type, select "PDF Standard". Make sure all pages are selected to download (unless you only need a specific selection), then click "Download".
5. Once your PDF has finished downloading, open it up and double check your edits and make sure your links work!

DON'T FORGET TO ALWAYS ADD YOUR NAME & CONTACT INFO!

Even if there's not a designated space for it, always make sure your customers have a quick and easy way to contact you or shop your site!
